

How to Record a Podcast in the Voyager Infinity Cove Greenscreen Studio

This comprehensive guide provides everything you need to know for hosts, creators, and guests using the Voyager Infinity Cove Greenscreen Studio. From pre-production considerations to post-recording options, we'll walk you through the entire process of creating professional podcast content with unlimited visual possibilities.

Understanding the Infinity Cove Studio

The Infinity Cove Studio is a premium greenscreen environment that can be used for podcast production. Its seamless green surface creates a distraction-free recording space without visible edges, corners or shadows.

This professional setup allows for complete flexibility in post-production, enabling you to place yourself or your guests in virtually any environment. Whether you're planning a sit-down conversation, standing delivery, or dynamic segments with movement, the infinity cove provides the perfect canvas for adding custom backgrounds later.

The studio is equipped with professional lighting designed specifically for chroma key work, ensuring clean edges and optimal keying results when your greenscreen background is removed in editing.

Pre-Production Planning

Essential Preparations Before Your Studio Session

Wardrobe Considerations

- Avoid wearing green, lime, neon, or reflective clothing
- Skip small checks, stripes, or busy patterns
- Choose outfits that contrast with your skin tone

Brand Look

- Decide on your virtual background style
- Bring logos or brand assets for post-production
- Consider how your wardrobe will look against final background

Content Structure

- Plan your run of show with clear segments
- Prepare questions for guests in advance
- Allow for natural pauses in conversation

Delivery Style

- Decide on sitting or standing presentation
- Practice hand gestures that stay within frame
- Consider camera angles and movement

Studio Equipment and Support

Our studio provides all the essential equipment you need for professional podcast recording. Understanding what's available helps you plan your session effectively.

Technical Setup

- Professional infinity cove greenscreen environment
- Complete lighting package (key, fill, backlight)
- High-quality cameras with experienced operator
- Studio-grade microphones for pristine audio

Additional Support Services

- Technical checks and equipment testing
- Recording assistance and troubleshooting
- Optional on-site editor/producer
- Media storage and transfer solutions

BYOD Options

- Integration with your own camera equipment
- Content storage via USB-C SSD, external drive or cloud
- Headphone monitoring for live audio checks
- Support for multi-camera setups upon request

All equipment is calibrated specifically for greenscreen work, ensuring clean edges and optimal keying results when your background is removed in post-production.

The Recording Process

Initial Setup (30 minutes before recording)

Arrive early to complete technical setup and final preparations. Our team will help you with microphone placement, perform a wardrobe check under studio lights, and ensure your content is accessible from USB drives or cloud storage.

Throughout the recording process, our technical team will monitor for quality and address any issues that arise, allowing you to focus entirely on delivering your content.

Technical Run-Through

Before recording begins, we'll test sound levels, adjust microphone distance, frame camera shots according to your preferences, and check the greenscreen lighting to ensure even exposure with no shadows that could affect post-production.

Recording Your Content

Follow your planned structure while maintaining a natural delivery. Speak clearly at a measured pace, remembering that audio quality is paramount. Consider repeating key messages naturally during conversation to create options for promotional clips later.

Post-Production Options

Background Replacement

Our post-production team can remove the green background and replace it with:

- Custom branded virtual sets
- Professional office or studio environments
- Abstract motion graphics or animations
- Branded backdrop with your logo and design elements

Audio-Visual Production

- Professional audio mixing and enhancement
- Perfect synchronisation of audio and video
- Custom intro and outro sequences
- Lower thirds for guest identification
- Format optimisation for multiple platforms

Our team can handle the entire post-production process or provide just the raw footage for your own editing team, depending on your needs and workflow preferences.

Add-On Services and Enhancements

Elevate your podcast with these additional production elements to create more professional and engaging content.

Animated Graphics

Custom animated titles, transitions, and graphics packages designed to match your brand identity. These elements add polish and professionalism to your production while reinforcing your visual branding.

Social Media Assets

Audiogram reels with animated waveforms, pull quotes, and branded elements designed specifically for social media promotion across platforms like Instagram, TikTok, and Twitter.

Interactive Elements

NFC integration allowing viewers to scan products or promotional materials to unlock additional content, augmented reality experiences, or exclusive offers related to your podcast.

These add-ons can be bundled with your studio booking or added later in the production process. Our team can provide samples and demonstrations to help you select the options that best support your content strategy.

Final Deliverables and Support

What to Expect After Your Session

After your recording session is complete, our process ensures you receive exactly what you need for your distribution and promotion strategy.

Raw Footage Transfer

If you're handling your own editing, we'll provide all raw video and audio files in your preferred format via secure file transfer or your own storage device.

Edited Content Delivery

For full-service clients, we'll deliver your completely edited podcast episode according to your specifications, ready for immediate distribution.

Promotional Materials

Optional delivery of social-ready clips, audiograms, thumbnails, and other promotional assets to support your marketing efforts.

Ongoing Support

Our team remains available for questions, advice on storytelling or streaming strategies, and to assist with planning future episodes.

As fellow creators, we're committed to your success beyond just providing studio facilities. Whether you need technical advice, creative input, or comprehensive production services, our team is here to support your podcast journey from concept to audience.
